Instance os

Evaluation Date 22 Oct 2026 08:37:00 AM (GMT+0100)

The 'Turn off Help Experience Improvement Program' setting specifies whether users can participate in the Help Experience Improvement program and can help Microsoft to improve the quality and relevance of their Help experience. The Help Experience Improvement program collects information about how customers use words and phrases into the Windows Help Search box. As this capability may allow the release of proprietary information to Microsoft, it should be configured according to the needs of the business.

The List String value/s X indicates the status of the Turn off Help Experience Improvement Program setting. A value of username:1 indicates the setting is enabled for the user; a value of username:0 indicates the setting is disabled for the user.

(7.7) 12025 Status of the 'Do not use diagnostic data for tailored experiences' (DisableTailoredExperiencesWithDiagnosticData) Group Policy setting — Failed — SERIOUS

Instance os
Evaluation Date 22 Oct 2026 08:37:00 AM (GMT+0100)

'Do not use diagnostic data for tailored experiences' group policy setting determines if Windows can use diagnostic data to provide tailored experiences to the user. Tracking, collection and utilization of personalized data is a privacy and security issue that is of concern to many organizations. This feature of collecting diagnostic data should be restricted as appropriate to the needs of the business.

The following List String value(s) of X indicate the list of Windows users accounts and the value set for the 'DisableTailoredExperiencesWithDiagnosticData' Windows registry setting on the host within 'HKEY_USERS\{USER SID}\Software\Policies\Microsoft\Windows\CloudContent'. This registry key on the local host backs the 'User Configuration\Policies\Administrative Templates\Windows Components\Cloud Content\Do not use diagnostic data for tailored experiences' group policy setting. NOTE: This setting is only available from Windows 10 Version 1703 or later.

(7.9) 23138 Status of the 'Turn off Spotlight collection on Desktop' setting — Failed — SERIOUS

Instance os
Evaluation Date 22 Oct 2026 08:37:00 AM (GMT+0100)

This policy setting removes the Spotlight collection setting in Personalization, rendering the user unable to select and subsequently download daily images from Microsoft to the system desktop. This feature downloads pictures and advertisements from the Bing server and displays them when the lock screen is being shown on user device. If this policy is enabled, Spotlight collection will not be available as an option in Personalization settings. If this policy is disabled do not configure, Spotlight collection will appear as an option in Personalization settings, allowing the user to select Spotlight collection as the Desktop provider and display daily images from Microsoft on the desktop. This setting should be configured as appropriate to the needs of the business.

Instance os
Evaluation Date 22 Oct 2026 08:37:16 AM (GMT+0100)

'Do not use diagnostic data for tailored experiences' group policy setting determines if Windows can use diagnostic data to provide tailored experiences to the user. Tracking, collection and utilization of personalized data is a privacy and security issue that is of concern to many organizations. This feature of collecting diagnostic data should be restricted as appropriate to the needs of the business.

The following List String value(s) of X indicate the list of Windows users accounts and the value set for the 'DisableTailoredExperiencesWithDiagnosticData' Windows registry setting on the host within 'HKEY_USERS\{USER SID}\Software\Policies\Microsoft\Windows\CloudContent'. This registry key on the local host backs the 'User Configuration\Policies\Administrative Templates\Windows Components\Cloud Content\Do not use diagnostic data for tailored experiences' group policy setting. NOTE: This setting is only available from Windows 10 Version 1703 or later.

Instance os
Evaluation Date 22 Oct 2026 08:34:45 AM (GMT+0100)

'Do not use diagnostic data for tailored experiences' group policy setting determines if Windows can use diagnostic data to provide tailored experiences to the user. Tracking, collection and utilization of personalized data is a privacy and security issue that is of concern to many organizations. This feature of collecting diagnostic data should be restricted as appropriate to the needs of the business.

The following List String value(s) of X indicate the list of Windows users accounts and the value set for the 'DisableTailoredExperiencesWithDiagnosticData' Windows registry setting on the host within 'HKEY_USERS\{USER SID}\Software\Policies\Microsoft\Windows\CloudContent'. This registry key on the local host backs the 'User Configuration\Policies\Administrative Templates\Windows Components\Cloud Content\Do not use diagnostic data for tailored experiences' group policy setting. (7.2) 9827 Status of the 'Turn off Help Experience Improvement Program' setting per user basis — Failed — SERIOUS

Instance os
Evaluation Date 22 Oct 2026 08:35:10 AM (GMT+0100)

The 'Turn off Help Experience Improvement Program' setting specifies whether users can participate in the Help Experience Improvement program and can help Microsoft to improve the quality and relevance of their Help experience. The Help Experience Improvement program collects information about how customers use words and phrases into the Windows Help Search box. As this capability may allow the release of proprietary information to Microsoft, it should be configured according to the needs of the business.

The List String value/s X indicates the status of the Turn off Help Experience Improvement Program setting. A value of username:1 indicates the setting is enabled for the user; a value of username:0 indicates the setting is disabled for the user.

Instance os
Evaluation Date 22 Oct 2026 08:35:10 AM (GMT+0100)

'Do not use diagnostic data for tailored experiences' group policy setting determines if Windows can use diagnostic data to provide tailored experiences to the user. Tracking, collection and utilization of personalized data is a privacy and security issue that is of concern to many organizations. This feature of collecting diagnostic data should be restricted as appropriate to the needs of the business.

The following List String value(s) of X indicate the list of Windows users accounts and the value set for the 'DisableTailoredExperiencesWithDiagnosticData' Windows registry setting on the host within 'HKEY_USERS\{USER SID}\Software\Policies\Microsoft\Windows\CloudContent'. This registry key on the local host backs the 'User Configuration\Policies\Administrative Templates\Windows Components\Cloud Content\Do not use diagnostic data for tailored experiences' group policy setting. (7.10) 9830 Status of the 'Prevent users from sharing files within their profile' setting — Failed — CRITICAL

Instance os
Evaluation Date 22 Oct 2026 08:35:10 AM (GMT+0100)

The 'Prevent users from sharing files within their profile' setting enables or disables file sharing among users. As this setting could facilitate the unauthorized sharing of confidential information, it should be configured according to the needs of the business

The List String value/s X indicates the status of the setting Prevent users from sharing files within their profile using the registry key path HKEY_USERS\SID\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer\NoInplaceSharing. A value of username:1 indicates the setting is enabled for the user; a value of username:0 indicates the setting is disabled for the user.

(7.12) 9836 Status of the 'Prevent Codec Download' setting — Failed — MEDIUM

Instance os
Evaluation Date 22 Oct 2026 08:35:10 AM (GMT+0100)

The policy 'Prevent Codec Download' setting allows you to prevent Windows Media Player from downloading codecs. If this setting is not configured, automatic downloading of codecs may occurs, which cause malicious code to be installed on the system. This setting should be configured according to the business needs.

The List String value/s X indicates the status of the setting Prevent Codec Download using the registry key path HKEY_USERS\SID\Software\Policies\Microsoft\WindowsMediaPlayer\PreventCodecDownload. A value of username:1 indicates the setting is enabled for the user.
